#### GENERAL DENTISTRY INFORMED CONSENT FOR PROCEDURES

#### NOTE: SOME PROCEDURES MAY NOT BE AVAILABLE AT THE SANTA YENZ TRIBAL HEALTH CLINIC

#### 1. Drugs and Medications

Antibiotics, analgesics, anesthetics, and other medications may cause allergic reactions causing redness and swelling of tissues, pain, itching, vomiting, and/or anaphylactic shock (severe allergic reaction).

#### 2. Changes in Treatment Plan

During treatment, it may be necessary to change or add procedures because of conditions found while working on the teeth that were not evident during examination; the most common being root canal therapy following routine restorative procedures.

#### 3. Removal of Teeth

There are (sometimes) alternatives to removal of teeth, which the dentist will explain to you. Removing teeth does not always remove all of the infection, and it may be necessary to have further treatment. There are risks involved in having teeth removed, including pain, swelling, spread of infection, dry socket, loss of feeling in teeth, lips, tongue and surrounding tissue (parasthesia) that can last for an indefinite period of time (days or months), or fractured jaw. Further treatment by a specialist or hospitalization, if complications arise during or following treatment, is the patient's responsibility.

#### 4. Crowns, Bridges, and Caps

Sometimes, it is not possible to match the color of natural teeth exactly with artificial teeth. Temporary crowns may be applied, which may come off easily, and it is the patient's responsibility to be (be careful to) ensure that they are kept on until the permanent crowns are delivered. The final opportunity to make changes in a new crown, bridge, or cap (including shape, fit, size, and color) will be before final cementation.

#### 5. **Dentures – Complete or Partial**

Full or partial dentures are artificial, constructed of plastic, metal and/or porcelain. The problems associated with wearing these appliances are looseness, soreness, and possible breakage. The final opportunity to make changes in a new denture (including shape, fit, size, and color) will bed the "teeth in wax" try-in visit. Most dentures require relining approximately three (3) to twelve (12) months after initial placement. The cost for this procedure is not included in the initial denture fee.

#### 6. Endodontic Treatment (Root Canal)

There is no guarantee that root canal treatment will save a tooth, and complications can occur from the treatment. Occasionally, metal objects are cemented in the tooth or extended through the root, which does not necessarily affect the success of the treatment. Occasionally, additional surgical procedures may be necessary following root canal treatment (apicoectomy).

#### 7. Periodontal Loss (Tissue & Bone)

Periodontal problems cause gum and bone inflammation or loss, which can lead to the loss of teeth. Alternative treatment plans are gum surgery, replacements, and/or extractions. Undertaking any dental procedures may have a future adverse effect on periodontal conditions.

#### 8. Fillings

Care must be exercised in chewing on fillings, especially in the first twenty-four (24) hours, to avoid breakage. A more extensive filling than originally diagnosed may be required due to additional decay. Significant sensitivity is a common aftereffect of a newly placed filling.

#### **CONSENT FOR TREATMENT**

Your signature below authorizes the dentist and/or hygienist of the Santa Ynez Tribal Health Clinic, to administer any treatment, or to administer such anesthetics, analgesics, and/or sedatives, and to perform such operations, as may be deemed necessary or advisable in your diagnosis and treatment. You acknowledge that you have been informed of all possible complications of the procedures, anesthetics, and/or drugs.

| Witness Signature: Date:   |  |  |  |  |  |  |

I attest that I have discussed the risks, benefits, consequences, and alternatives of crowns, bridges and veneers with the patient, who has had the opportunity to ask questions, and I believe my patient understands what has been explained.

## Santa Ynez Tribal Health Clinic Cancellation/No Show Policy

The mission of the Santa Ynez Tribal Health Clinic is to provide the highest quality of health care, honoring cultural values and integrating best practices. When any of our scheduled appointments are cancelled by a patient with short notice, when a patient arrives late for their appointment, or when a patient "no shows", there is insufficient time for us to reappoint that time for another patient. Late cancellations/arrivals or "no shows" are a lost opportunity for patients to take advantage of our valued services.

The following guidelines outline our Cancellation/No-Show policy for the SYTHC Behavioral Health/Medical/Dental clinics, effective immediately:

- Cancellations of scheduled appointments should be received by the Front Office, **at least 24-hours prior** to the scheduled appointment time.
  - Exceptions will be considered in the event of an emergency or illness on a case-by-case basis.
  - Any late cancellation (not received 24 hours prior to the appointment time) will be considered a "no-show".
- When a patient arrives more than nine (9) minutes late for their scheduled appointment time, the appointment will be considered a "no-show".
- If a patient does not show up (w/o sufficient or zero notice) for their scheduled appointment, this will be considered a "no-show".
- If a patient has two (2) "no-shows" over a 6-month timeframe for any of our clinical departments, the patient may <u>not</u> be eligible to schedule an appointment in that clinical department for six (6) months, from the date of the second no-show.

Please sign this form, indicating your understanding of our cancellation/no-show policy. Your cooperation is vital to the clinic's ability to offer the highest quality health care to all of our patients.

| Sincerely,                                   |          |  |
